**REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

There are prior teachings for a method of determining a title from a document image by dividing the document image into minimal circumscribing rectangles which contain a character image; recognizing characters in said minimal circumscribing rectangles; and determining a title of the document image based upon likelihood being determined by a summation of points obtained during said character recognition and said title determination, the summation of the points being determined based upon natural language likelihood and any combination of character row area coordinates, character type, number of characters, character code assurance, character minimum circumscribing rectangle coordinates, and character minimum circumscribing rectangle size (as disclosed in previous Office Actions). However, the prior art of records do not teach the concept wherein "the natural language likelihood being determined based upon comparison to a predetermined title dictionary" in combining with the aforementioned limitations in determining a title from a document image.
